Hiring Committee
Aurora University

APPLICATION — COMPUTATIONAL LINGUIST

Dear Hiring Committee:

I am applying to Aurora University because this opportunity calls for the same combination of judgement and execution that has shaped my work.

Computational linguist studying multilingual language technology, evaluation, and equitable speech interfaces. Develops corpus and benchmark methods for Korean and other underrepresented languages, with a focus on reproducibility and community governance.

Two recent results show the contribution I can make.

Directs the Language Systems Lab and supervises eight graduate researchers. Teaches multilingual NLP, corpus methods, and responsible model evaluation.

What attracts me to Aurora University is the opportunity to apply that experience with a team that values clear decisions, careful execution, and measurable outcomes.

I would welcome the opportunity to discuss the role and the contribution I could make.

Sincerely,

Hana Kim, PhD

Computational Linguist
