Hiring Committee
Atlas Systems

APPLICATION — STAFF PLATFORM ENGINEER

Dear Hiring Committee:

I am applying to Atlas Systems because this opportunity calls for the same combination of judgement and execution that has shaped my work.

Platform engineer with 9 years of experience building reliable developer infrastructure for high-volume products. Specializes in Kubernetes, distributed systems, observability, and paved-road tooling that improves both delivery speed and production safety.

The evidence I would bring is concrete:

- Designed the multi-region control plane handling 2.4B API requests per day at 99.99% availability.
- Cut median service bootstrap time from 3 days to 24 minutes with a typed developer platform.

What attracts me to Atlas Systems is the opportunity to apply that experience with a team that values clear decisions, careful execution, and measurable outcomes.

I would welcome the opportunity to discuss the role and the contribution I could make.

Sincerely,

Mateo Alvarez

Staff Platform Engineer
